From Sugars to Suds: Genotypic Variation in Arabinoxylan Content and Structure

Cameron Matthews[1] (Cameron.Matthews@ndus.edu), Zhao Jin[1], Chaofan Sun[1], Aoli Xiang[1], Richard Horsley[1]
NDSU Department of Plant Sciences[1]

NDSU NORTH DAKOTA STATE UNIVERSITY

Key Insight

- Arabinoxylan traits are genetically controlled
- Size ≠ content
- Rankings shift by environment

Why Brewers Should Care

- Wort viscosity
- Lautering efficiency
- Clarity and consistency

Why Breeders Should Care

- Selectable genetic variation
- Trait decoupling possible
- End-use–driven selection
